

Conformity Assessment: Trade Documentation Services

**Achieving Reliability and Interoperability for
Services replacing Paper in Trade**

Pamela Mar, Hans J. Huber

Conformity Assessment: Trade Documentation Services

Introduction: Tim and Hans

- Tim Bouma,

Digital Governance Council | Conseil de Gouvernance Numerique,
Canada

- Hans J. Huber

id4.trade GmbH, Germany

Conformity Assessment: Trade Documentation Services

Our approach

Key Trade Documents and Data Elements (KTDDE)

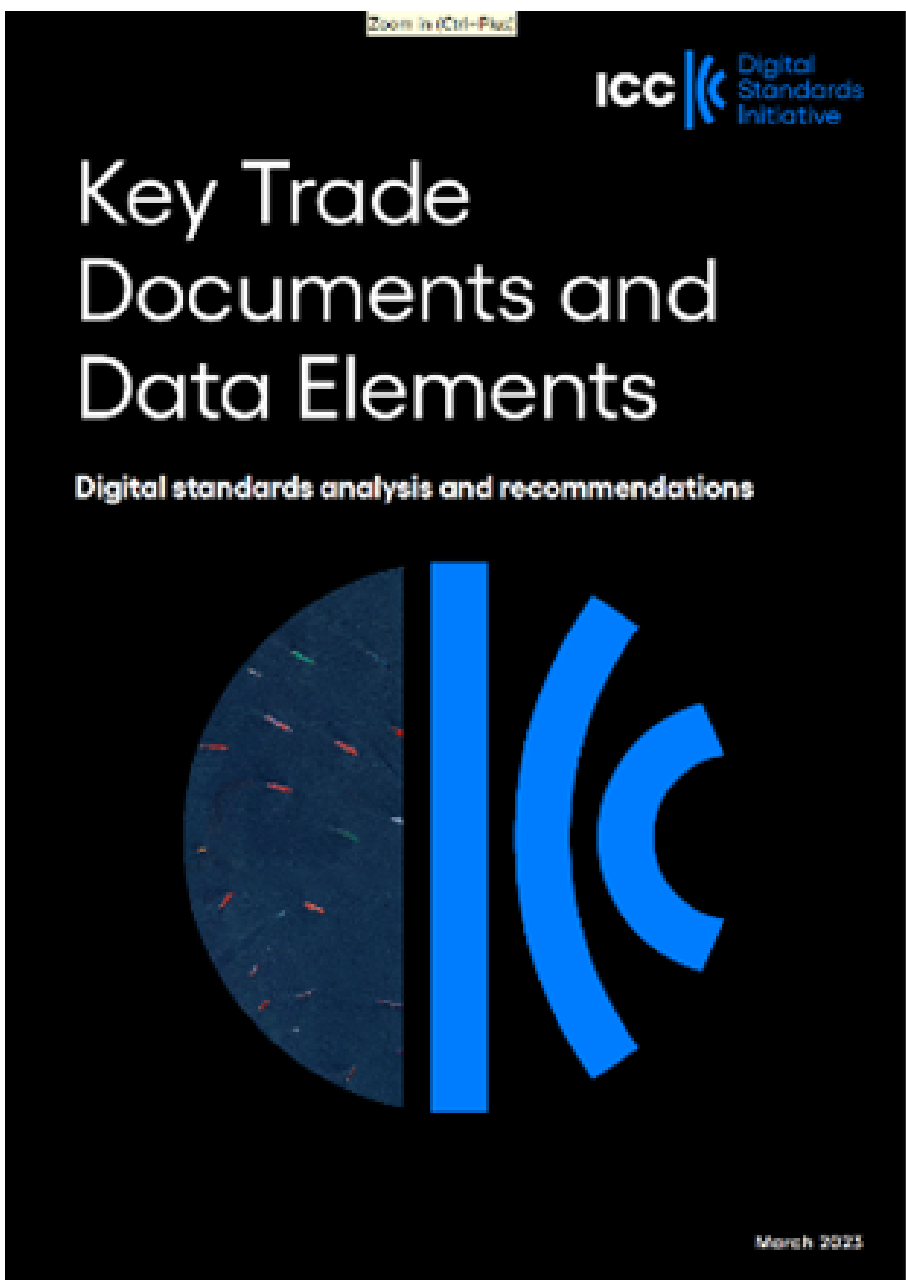

Defining a global baseline standard for the global trade documents and data

Trusted Trade Environment

Defining the pillars of a trusted trade data space

Conformity Assessment

Defining standardized digital trade documentation services

Conformity Assessment: Trade Documentation Services

The scope of the assessment

- Subject of the CAS => Trade data services replacing paper documentation
- Objects of conformity => The trade documentations in the KTDDE scope
- Master conformity dimensions
 - interoperability, a technical angle
 - reliability, a legal and technical angle

Sub dimensions for reliability and interoperability should be defined to determine service properties.

Example **Reliability**: System uptime 99,99% (equals 8,76 hours downtime p.a.) Example **Interoperability**: Date information transfer done according to ISO 8601

Conformity Assessment: Trade Documentation Services

The maturity model

- How will the trajectory for Assessment candidates look like?
- 2 elements: Pass / Fail
- 3 elements: Starters, Qualified, Gold
- 5 elements: ...
- Your views please!

Conformity Assessment: Trade Documentation Services

Risks?

- Are there any risks we should see and monitor?
- Your views please!

Conformity Assessment: Trade Documentation Services

The Process
